mandate which is to make all the rural roads in Osun State motorable and linking all the rural parts of the state with good roads.

Speaking with newsmen during an inspection visit to Aba Elewa-Isamosita-Odo-Oba in Iwo LGA, the project coordinator declared that " I am very happy with this innovation we have introduced to the delivering of our projects. Novocrete Soil Stabilization technology is currently the world's most recent innovation in road construction. The appreciation of Novocrete is increasing globally because it is cost-effective and very much durable than the conventional laying of Asphalts. We are confident that with this technology we will achieve more roads in good time and take maximum advantage of the coming dry

of the coming dry season."

In appreciating the efforts of the state government, the Project Coordinator praised Governor Gboyega Oyetola for embracing this new technology and the massive support Osun RAMP has enjoyed from the state government.

The community members were also happy for the opportunity given to them. While expressing her joy over the application of Novocrete, Mrs Babatunde Idowu, thanked the Government of the State of Osun for the landmark achievement. In her words "infact the Government of Osun State make us proud for choosing our road for such application. We will continually be grateful to the
